

The Commercial Licence allows you to work as a Professional Pilot which means that you may now fly for remuneration. With this qualification you are now able to apply for a position in one of the many different commercial operations the aviation industry has to offer.

For a CPL with Instrument Rating you will need 200 hours Total Flight Time. 100 hours of which 100 hours of which must be PIC (Pilot in Command) and 50 hours thereof must be cross country, a further 40 hours of instrument flight time is required. At least 5 hours of your training will need to be done on a complex aircraft. We recommend the student complete all CAA CPL exams & has ± 160 hours total flight time before beginning instrument training.

| | Units | Rate | Total |
|---|-------|------------|--------------------|
| Simulator training - Single Engine (FNPT II) | 12 | R 950.00 | R 11 400.00 |
